

Specifications:

Power plant:	50 horsepower Deutz 2011 3 cylinder Tier 4i Air Cooled diesel, Enclosed engine compartment
Hydraulic system:	Hydraulic tank: 90 gallon, Replaceable spin on return filter, Hydraulic pump: 3 section gear pump
Fuel tank:	28 gallon
Drum:	4' diameter x 9' long , 4 removal screens, Variable speed chain driven 0-25 rpm
Brush:	(1) brush adjustable from the ground
Feeder:	24" belt, 2 ply 3/8 thick vulcanized, Hydraulically driven variable speed - 0 to 13 fpm
Fines conveyor:	30" belt, 2 ply 3/8 thick vulcanized, Hydraulically driven
Chassis:	Welded construction steel channel, Single axle, electric brakes 2 hydraulic operated jacks at towbar end of machine Removable tow bar with adjustable pintle hitch. TDOT lights
Weight:	12,500 lbs
Tongue weight:	1,640 lbs

**FIRST, WE SHOOK UP
THE VIBRATING SCREEN MARKET...**

**NOW WE'RE ABOUT TO STIR UP
THE TROMMEL SCREEN MARKET.**

INTRODUCING THE NEW EZ-SCREEN 409 TROMMEL SCREENER.

The Perfect Screener for Landscapers, Excavators, and Municipalities

For more than 15 years, Argus Industrial Co. has been producing the finest line-up of efficient, portable, screening plants. Our work horse EZ machines that out-engineer, out-perform, out-feature, out-last and offer out-and-out better value for the money than anything in the market.

Now that same manufacturing philosophy, backed by outstanding personal service, is behind our first trommel screen machine. The new EZ-Screen 409 Trommel Screener.

If your operation deals with screening lighter, wetter materials -- mulch, topsoil and compost -- a trommel screener is the way to go. The constant tumbling action stirs up material over and over, fluffing it, adding air to lighten it, and keeps it in contact with the rotating mesh longer. So more material slips through faster and more easily.

Which makes the EZ-409 the perfect machine for landscapers, excavating contractors and municipalities.

And what makes the EZ-409 the better choice over other trommel screeners? The big reason is its small price. Because we sell direct, one to one. No sales force. No inventory. No showrooms. No commissions.

Another reason is a whole list of reasons: like a powder-coat finish; vulcanized conveyor belts; a durable 50 HP Deutz diesel engine; auxiliary hydraulics for adding another stockpiling conveyor; and hydraulic jacks at the discharge end for the proper tilt angle to adjust the material flow speed.

Like all our screeners, the new EZ-409 is easily trucked from job site to job site. Set up is quick, too. Working with a ½ to 1 ¾-yd loader, the EZ-409 is designed, engineered and manufactured to provide outstanding production for specialized screening operations. And with a smooth, rotating drum action, it has a long and trouble-free life.

Whatever type material you screen, whether it needs to be shaken or stirred, we have a screener to match.

The **EZ-Screen 409 Trommel Screener** is a product of Argus Industrial Co., manufacturer of the EZ-Screen range of screening plants – all offering innovation, productivity, versatility and value through patented designs, exclusive features, quality manufacturing and outstanding customer service.

Argus Industrial Co., L.L.C. has a policy of continuous product improvements and reserves the right to change specifications, designs or prices anytime without notice or the incurring of any obligations.
