

**THE EZ WAY TO
DOUBLE PRODUCTION...**

**WITHOUT ADDING
ANOTHER LOADER!**

Ordinary box screeners can't work as hard as the **EZ Screen 1200XL**, unless they're teamed with two loaders. The secret's the **EZ Screen 1200XL's** built-in conveyor system.

With a typical box screener, the loader operator has two jobs. Job one is keeping the screener filled with material. Job two is using the loader to scoop fines out of the machine and move them to the stockpile.

With the **EZ Screen 1200XL** on the site, the loader operator has just one job: loading the screener. The other job, moving fines, is handled by the 24"- wide conveyor that's able to stockpile material 9' high or into a truck.

New screener math: productivity is doubled. In fact, yield is now dependent only on the efficiency of the loading operation. No more wasted time running the screener without material, thereby maximizing production.

Increased efficiency is only half the productivity equation. The other half is dependability. Which is why the **EZ Screen 1200XL** is built with the highest-quality components. Like its never-say-die, air-cooled diesel engine. It sips fuel, so it'll run long and hard without refueling.

NEW OPTION: Middle Product Conveyor produces three (3) Different sized materials in one operation.

Is the **EZ Screen 1200XL** right for your applications? Ask us, it's all part of our total commitment to customer service.

- Weight - 7360 lbs.
- Tongue weight - 1630 lbs.
- Overall length - 29'
- Overall width - 5'-7"
- Overall height - 9'-1"

The **EZ Screen 1200XL** is a product of Argus Industrial Co., manufacturer of the EZ Screen range of screening plants – all offering innovation, productivity, versatility and value through patented designs, exclusive features, quality manufacturing and outstanding customer service.

Argus Industrial Co., L.L.C. has a policy of continuous product improvements and reserves the right to change specifications, designs or prices anytime without notice or the incurring of any obligations.

- FEATURES -

- Loading bucket size range: ½ to 1¾ yards with a 8½' feed height
- Air-cooled 2 Cylinder Kohler diesel, 25-HP.
- An hour meter and electric starting system is standard
- Exide "Spiral Wound" battery for long life in a vibratory environment
- Dual stage air filter system
- Fully enclosed, lockable engine compartment and starter panel
- Patent Pending, energy conserving, KINETIC conveyor drive
- Patented non-hydraulic screen drive
- Hydraulically driven 24" wide vulcanized "Endless" conveyor with 9' dump height
- Hydraulic drive components are by Eaton and Char-Lynn
- Conveyor components are U.S. made CEMA "B" grade
- All EZ-Screen surfaces are a baked powder coat finish
- Custom made sealed wiring harness with lights for street legal towing
- Tow hitch has safety chains, automatic safety break-away controller with battery
- Hydraulic raising and lowering tongue with 3" pintle eye/lunette ring
- 7,000 lb. capacity E-Z lube axle on rear with hydraulic activated rear pivoting assembly
- Electric brakes, 235/85R16 Load range "E" 10 ply trailer tires plus detachable mud-flaps
- 6' X 5' Screenbox with end tensioned screens
- **NEW OPTION:** Middle Product Conveyor

*To insure safe towing, always be certain that the tow vehicle is properly equipped.
